1. The amendment filed on 03/17/2009 has been entered and considered by Examiner.

Allowable Subject Matter

2. Claims 1-27 are allowed.
3. The following is an Examiner's statement of reasons for allowance:

Regarding independent claims 1, and 27:

4. The most closest prior art of record Doerfel et al. (US 7046271 B2) discloses an arrangement of an imaging device with the picture elements (i.e. $\alpha_{i,j}$) in a raster rows and columns (i.e. i and j) in pixels render bits of partial information from at least three views of the scene (see the abstract and column 4, lines 20-46), and wavelength filter arrays in rows and columns with filter elements (i.e. β_{pq}) with specified range (i.e. range of visible light, see column 25, lines 40-52).

Kleinberger et al. (US Pub: No: 2002/0030888 A1) discloses a full color flat screen binocular stereoscopic viewing device with color filters and display picture elements (see Fig. 5 and 6, [0182-0183]), but both Doerfel and Kleinberger do not teach or suggest that the **ratio between the areas covered by filter elements transparent to light of specified wavelength range and the total area of all filter**

elements, multiplied by the average number of the different views displayed per row of the raster of pixels is greater than 1.

The reference above singly or combined does not teach the uniquely distinct features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issues fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
